**Finite Element Analysis of
Transonic Flows Over Thin

User's Manual** H. C. Chen
1976 A finite element program
is described for computing
steady and unsteady
(oscillatory and transient)
transonic flows over thin airfoils
by solving directly the
unsteady, nonlinear transonic
potential equation based on

small disturbance theory. The
present numerical algorithm is
developed using the concept of
finite elements in conjunction
with the least squares method
of weighted residuals applied to
both space and time. The basic
element presently used is a
product of an element in space
and an element in time. The
former has a cubic expansion
inside each element, while the
latter is a quadratic Lagrangian
element. For each time step,
the finite element discretization
in both space and time results
in a recurrence relationship in
the form of a banded system of
algebraic equations, which is
solved by Gaussian elimination.
The embedded shocks are
smeared and a matching
scheme for computing
effectively flow over lifting
airfoils is also incorporated in
the program. The present
computer program is composed
of two parts: the first part
(designated as UTRANL-I)
generates, from a limited
number of input cards, the
necessary mesh information
and, if desired, produces a

second part (UTRANL-II) carries out the analysis and displays the pressure coefficients along the chordline on printer plots. Two sample cases of flow over a NACA 64A 410 and a NACA 64A 006 airfoils are given to demonstrate the applicability and usage of the program. The solution procedures are found to be quite efficient and accurate, permitting the aerodynamic forces to be calculated to engineering accuracy in less than ten minutes CPU time on a CDC 6600 computer for the most time consuming case among all those studied. How to Build Max-Performance Ford FE Engines Barry Rabotnick 2010 The Ford FE (Ford Edsel) engine is one of the most popular engines Ford ever produced, and it powered most Ford and Mercury cars and trucks from the late 1950s to the mid-1970s. For many of the later years, FE engines were used primarily in truck applications. However, the FE engine is experiencing a renaissance; it is now popular in high-performance street, strip, muscle cars, and even high-performance trucks. While high-performance build-up

principles and techniques are discussed for all engines, author Barry Rabotnick focuses on the max-performance build-up for the most popular engines: the 390 and 428. With the high-performance revival for FE engines, a variety of builds are being performed from stock blocks with mild head and cam work to complete aftermarket engines with aluminum blocks, high-flow heads, and aggressive roller cams. *How to Build Max-Performance Ford FE Engines* shows you how to select the ideal pistons, connecting rods, and crankshafts to achieve horsepower requirements for all applications. The chapter on blocks discusses the strengths and weaknesses of each particular block considered. The book also examines head, valvetrain, and cam options that are best suited for individual performance goals. Also covered are the best-flowing heads, rocker-arm options, lifters, and pushrods. In addition, this volume covers port sizing, cam lift, and the

best rocker-arm geometry. The FE engines are an excellent platform for stroking, and this book provides an insightful, easy-to-follow approach for selecting the right crank, connecting rods, pistons, and making the necessary block modifications. This is the book that Ford FE fans have been looking for.

Specifically, the Manual: - Provides over 750 examples of realistic sample footnote disclosures to assist in the preparation of financial statements for an audit, a review, or a compilation engagement. - Facilitates compliance with U.S. GAAP by integrating, in each chapter, the specific disclosure and key presentation requirements with the sample footnotes. - Provides sample disclosures that are technically sound, understandable, and

comprehensive and that cover a variety of scenarios, from the most common to the most unusual. - Incorporates all currently effective accounting standards, including those that cover areas of unusual difficulty, such as revenue recognition, financial instruments, fair value, business combinations, consolidation, income taxes, pensions, leases, accounting changes, and variable interest entities. This Manual is arranged into the following major parts, consistent with the Codification's structural organization: - Part 1 General Principles (ASC Topics 100s) - Part 2 Presentation (ASC Topics 200s) - Part 3 Assets (ASC Topics 300s) - Part 4 Liabilities (ASC Topics 400s) - Part 5 Equity (ASC Topics 500s) - Part 6 Revenue (ASC Topics 600s) - Part 7 Expenses (ASC Topics 700s) - Part 8 Broad Transactions (ASC Topics 800s) The Manual is designed for ease of use. This section provides reference to the relevant FASB ASC Topic. 3. Disclosure and Key Presentation Requirements. This section provides a detailed listing of (a) the disclosure requirements (FASB ASC Section 50) and (b) those key presentation requirements (FASB ASC Section 45) that are relevant to enhance compliance with and better understand the disclosure requirements. This section also provides specific references to the FASB ASC paragraphs that prescribe the specific disclosure or key presentation requirement. GAAP Financial Statement Disclosures Manual,

2022-2023 George Georgiades
2022-07-26 The GAAP Financial
Statement Disclosures Manual
provides a complete, quick, and
valuable reference source for
financial statement disclosures
and key presentation
requirements. Specifically, the
Manual: - Provides over 750
examples of realistic sample
footnote disclosures to assist in
the preparation of financial
statements for an audit, a
review, or a compilation
engagement. - Facilitates
compliance with U.S. GAAP by
integrating, in each chapter,
the specific disclosure and key
presentation requirements with
the sample footnotes. -
Provides sample disclosures
that are technically sound,
understandable, and
comprehensive and that cover
a variety of scenarios, from the
most common to the most

unusual. - Incorporates all
currently effective accounting
standards, including those that
cover areas of unusual
difficulty, such as financial
instruments, fair value,
business combinations,
consolidation, income taxes,
pensions, accounting changes,
and variable interest entities.
This Manual is arranged into
the following major parts,
consistent with the
Codification's broad structure: -
Part 1 General Principles (Topic
Codes 100s) - Part 2
Presentation (Topic Codes
200s) - Part 3 Assets (Topic
Codes 300s) - Part 4 Liabilities
(Topic Codes 400s) - Part 5
Equity (Topic Codes 500s) - Part
6 Revenue (Topic Codes 600s) -
Part 7 Expenses (Topic Codes
700s) - Part 8 Broad
Transactions (Topic Codes
800s) The Manual is designed
for ease of use. Accordingly,
each chapter is structured as a
stand-alone chapter, providing
you with all the information
you'll need on a specific topic.
Each chapter consists of the
following parts: 1. Executive

provides a clear and concise discussion of the specific financial statement topic. 2. Authoritative Accounting Literature. This section provides reference to the relevant FASB ASC Topic. 3. Disclosure and Key Presentation Requirements. This section provides a detailed listing of (a) the disclosure requirements (FASB ASC Section 50) and (b) those key presentation requirements (FASB ASC Section 45) that are relevant to enhance compliance with and better understand the disclosure requirements. This section also provides specific references to the FASB ASC paragraphs that prescribe the specific disclosure or key presentation requirement. Some of the items included in this section do not refer to any specific authoritative literature. Nevertheless, the disclosure or presentation items they address are considered informative for users of the financial statements and usually are disclosed or presented. These disclosures or presentation items are generally accepted by

accountants and auditors and, accordingly, are referenced as "Generally accepted practice" in this section. 4. Examples of Financial Statement Disclosures. This section contains specific examples of disclosures that cover different situations, circumstances, assumptions, and so on. Unless specifically indicated, the examples provided assume that the most recent financial statements presented are for the year ended December 31, 20X2. This edition of the Manual incorporates the financial statement disclosure requirements through FASB Accounting Standards Update No. 2022-02, Financial Instruments--Credit Losses (Topic 326): Troubled Debt Restructurings and Vintage Disclosures. Material can be located several ways: the Cross-Reference shows the chapter in which a particular pronouncement is discussed; the Index provides a quick page reference. CONTENTS: The GAAP Financial Statement Disclosures Manual includes the following topics: Part I General

Judeophobia Peter Schäfer

1997 Taking a fresh look at what the Greeks and Romans thought about Jews and Judaism, Peter Schäfer locates the origin of anti-Semitism in the ancient world. Judeophobia firmly establishes Hellenistic Egypt as the generating source of anti-Semitism, with roots extending back into Egypt's pre-Hellenistic history. A pattern of ingrained hostility toward an alien culture emerges when Schäfer surveys an illuminating spectrum of comments on Jews and their religion in Greek and Roman writings, focusing on the topics that most interested the pagan classical world: the exodus or, as it was widely interpreted, expulsion from Egypt; the nature of the Jewish god; food restrictions, in particular abstinence from pork; laws relating to the sabbath; the practice of circumcision; and Jewish proselytism. He then probes key incidents, two fierce outbursts of hostility in Egypt: the destruction of a Jewish temple in Elephantine in 410

B.C.E. and the riots in Alexandria in 38 C.E. Asking what fueled these attacks on Jewish communities, the author discovers deep-seated ethnic resentments. It was from Egypt that hatred of Jews, based on allegations of impiety, xenophobia, and misanthropy, was transported first to Syria-Palestine and then to Rome, where it acquired a new element: fear of this small but distinctive community. To the hatred and fear, ingredients of Christian theology were soon added—a mix all too familiar in Western history.
