Breaking Her R.K. Lilley 2016-03-28 From internationally bestselling author R.K. Lilley comes a scorching new series with melt-the-pages tension and all-consuming angst. It's love, it's war and it's Scarlett and Dante's story. DESTRUCTION. BETRAYAL. RUINATION. TRUE LOVE. Breaking Her Book Two in the Love is War Duet. This is the conclusion of Scarlett and Dante's story. SCARLETT He had done it again. Ravaged me. Burned me. Broken me. Given me air, only to leave me gasping, writhing. But then something changed. Something that terrified and excited me both. Something that utterly destroyed me. Something that made me whole again. DANTE Our love was cursed from the start. She didn't know it but I did. All she knew was that I'd lied to her, betrayed her. Done unforgivable things. Unavoidable things. Yes, I had broken promises as surely as I had broken her heart. But, just as every war has casualties, and every lie has consequences—every bastard has his reasons.

Plant Growth-Promoting Microbes for Sustainable Biotic and Abiotic Stress Management Heba I. Mohamed 2021-05-02 Abiotic and biotic stress factors, including drought, salinity, waterlog, temperature extremes, mineral nutrients, heavy metals, plant diseases, nematodes, viruses, and diseases, adversely affect growth as well as yield of crop plants worldwide. Plant growth-promoting microorganisms (PGPM) are receiving increasing attention from agronomists and environmentalists as candidates to develop an effective, eco-friendly, and sustainable alternative to conventional agricultural (e.g., chemical fertilizers and pesticide) and remediation (e.g., chelators-enhanced phytoremediation) methods employed to deal with climate change-induced stresses. Recent studies have shown that plant growth-promoting bacteria (PGPB), rhizobia, arbuscular mycorrhizal fungi (AMF), cyanobacteria have great potentials in the management of various agricultural and environmental problems. This book provides current research of biofertilizers and the role of microorganisms in plant health, with specific emphasis on the mitigating strategies to combat plant stresses.

Bad Things R. K. Lilley 2013-06-10 Danika hasn't had an easy life. Being insanely attracted to bad boys has never helped make it easier. One look at Tristan, and every brain cell she possessed went up in smoke. This man was trouble with a capital T. It was a given. She knew better. Bad boys were bad. Especially for her. Considering her history, it was crazy to think otherwise. So why did crazy have to feel so damn fine? For as long as she could remember, Danika had been focused on the future with single-minded purpose. Tristan came along and taught her everything there was to know about letting go, and living in the present. She fell, hard, and deep. Of course, that only made her impact with the ground that much more devastating. Bad Things is about Tristan and Danika, and their train wreck of a love story. This series can be read as a standalone, or with the Up in the Air trilogy. This book is intended for ages 18 and up.

Advances in Turbulence VII Uriel Frisch 2012-12-06 Advances in Turbulence VII contains an overview of the state of turbulence research with some bias towards work done in Europe. It represents an almost complete collection of the invited and contributed papers delivered at the

Seventh European Turbulence Conference, sponsored by EUROMECH and ERCOFTAC and organized by the Observatoire de la Côte d'Azur. New high-Reynolds number experiments combined with new techniques of imaging, non-intrusive probing, processing and simulation provide high-quality data which put significant constraints on possible theories. For the first time, it has been shown, for a class of passive scalar problems, why dimensional analysis sometimes gives the wrong answers and how anomalous intermittency corrections can be calculated from first principles. The volume is thus geared towards specialists in the area of flow turbulence who could not attend the conference as well as anybody interested in this rapidly moving field.

Grounded R.K. Lilley 2013-02-10 Grounded, Book 3 in the Up In The Air Trilogy. James and Bianca's story draws to a close in the explosive conclusion to the Up In The Air Trilogy. After a short but earnest courtship, Bianca can no longer deny her feelings for James, and though she's tried her hardest, she can't help but see that he cares deeply for her, as well. In a completely uncharacteristic move, she has put aside her misgivings and agreed to live with the enigmatic billionaire. Is her leap of faith the beginning of something wonderful, or is it too much, too fast? As James and Bianca feel a growing need for each other that neither can deny, circumstances beyond their control intervene, trying to tear them apart. Amidst the ever mounting threat of a monster who wants Bianca dead, and the constant pitfalls of an indiscreet past that James can't seem to escape, can these two passionate lovers manage to find their happily ever after?

Written by more than 25 expert academics and clinicians, this evidence-based guide takes a patient-focused approach to help you deliver safe, coordinated oral health care for patients with medical conditions. Other sections contain disease descriptions, pathogenesis, coordination of care between the dentist and physician, and key questions to ask the patient and physician.

Indigenous Peoples and the Collaborative Stewardship of Nature Anne Ross 2011-01 Comprehensive and global in scope, this book critically evaluates the range of management options that claim to have integrated Indigenous peoples and knowledge, and then outline an innovative, alternative model of co-management, the Indigenous Stewardship Model. **Organizational Dynamics of Technology-Based Innovation: Diversifying the Research Agenda** Tom McMaster 2007-08-08 This volume presents papers from the 10th Working Conference of the IFIP WG 8.6 on the adoption and diffusion of information systems and technologies. It explores the dynamics of how some technological innovation efforts succeed while others fail. The book looks to expand the research agenda, paying special attention to the areas of theoretical perspectives, methodologies, and organizational sectors.

Adaptive Strategies for Water Heritage Carola Hein 2019-10-18 This Open Access book, building on research initiated by scholars from the Leiden-Delft-Erasmus Centre for Global Heritage and Development (CHGD) and ICOMOS Netherlands, presents multidisciplinary research that connects water to heritage. Through twenty-one chapters it explores landscapes, cities, engineering structures and buildings from around the world. It describes how people have actively shaped the course, form and function of water for human settlement and the development of civilizations, establishing socio-economic structures, policies and cultures; a rich world

of narratives, laws and practices; and an extensive network of infrastructure, buildings and urban form. The book is organized in five thematic sections that link practices of the past to the design of the present and visions of the future: part I discusses drinking water management; part II addresses water use in agriculture; part III explores water management for land reclamation and defense; part IV examines river and coastal planning; and part V focuses on port cities and waterfront regeneration. Today, the many complex systems of the past are necessarily the basis for new systems that both preserve the past and manage water today: policy makers and designers can work together to recognize and build on the traditional knowledge and skills that old structure embody. This book argues that there is a need for a common agenda and an integrated policy that addresses the preservation, transformation and adaptive reuse of historic water-related structures. Throughout, it imagines how such efforts will help us develop sustainable futures for cities, landscapes and bodies of water.

The Protein Protocols Handbook John M. Walker 2007-10-02 The Protein Protocols Handbook, Second Edition aims to provide a cross-section of analytical techniques commonly used for proteins and peptides, thus providing a benchtop manual and guide for those who are new to the protein chemistry laboratory and for those more established workers who wish to use a technique for the first time. All chapters are written in the same format as that used in the Methods in Molecular Biology™ series. Each chapter opens with a description of the basic theory behind the method being described. The Materials section lists all the chemicals, reagents, buffers, and other materials necessary for carrying out the protocol. Since the principal goal of the book is to provide experimentalists with a full account of the practical steps necessary for carrying out each protocol successfully, the Methods section contains detailed step-by-step descriptions of every protocol that should result in the successful execution of each method. The Notes section complements the Methods material by indicating how best to deal with any problem or difficulty that may arise when using a given technique, and how to go about making the widest variety of modifications or alterations to the protocol. Since the first edition of this book was published in 1996 there have, of course, been significant developments in the field of protein chemistry.

Claimed Royalty Betty Shreffler 2019-02-04 In a world where a woman's purity is the fine line between being Queen and being killed, he was given one duty--to protect my purity and above all, to protect me. Both were a battle we weren't ready for. Forced by tradition, and as their chosen Queen, I must endure my trials and the suitor phase, ultimately giving myself to a man from the Royal Houses. Each one competes to be my King, all wanting what no other has had...my purity. To have what I truly want would risk my entire reign, but to do what is expected of me would destroy my heart. My only protection is to follow through, giving each royal the opportunity to win their prize...me in a bedroom suite and a crown atop their head. Behind closed doors, I commit my biggest sin, loving a man I'm forbidden to have. When the time comes for me to be crowned, I'll be forced to make a choice--risk our love or risk my life.

Language-Learner Computer Interactions Catherine Caws 2016-06-14 This book focuses on learner-computer interactions (LCI) in second language learning environments drawing largely on sociocultural theories of language development. It brings together a rich and varied range of theoretical discussions and applications in order to illustrate the way in which LCI can enrich our comprehension of technology-mediated communication, hence enhancing learners' digital literacy skills. The book is based on the premise that, in order to fully understand the nature of language and literacy development in digital spaces, researchers and practitioners in linguistics, sciences and engineering need to borrow from each others' theoretical and practical toolkits. In light of this premise, themes include such aspects as educational ergonomics, affordances, complex systems learning, learner personas and corpora, while also describing such data collecting tools as video screen capture devices, eye-tracking or intelligent learning tutoring systems. The book should be of interest to applied linguists working in CALL, language educators and professionals working in education, as well as computer scientists and engineers wanting to expand their work into the analysis of human/learner interactions with technology communication devices with a view to improving or (re)developing learning and communication instruments. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

Mr. Beautiful R.K. Lilley 2014-10-15 MR. BEAUTIFUL (UP IN THE AIR #4) JAMES She was my sin and my temple. I both worshipped and defiled there. Gloried and desecrated. Revered and debased. I've been remade

four times in my life. It is a distinct feeling. Impossible to mistake. The very marked sensation of being unraveled and reknit into a new thing, a new person. It can be good or bad, helpful or harmful, but above all, it is unstoppable. I was remade when my parents died, went from a happy childhood, into navigating a very dark world, with endless responsibilities, surrounded by enemies, and despairingly alone. It happened again at the hands of a cowardly predator. I'd become angrier with that one, more cynical, and it undoubtedly turned me into the kinky f**k I was today. The third happened swiftly. One day I looked up into a pair of pale blue eyes and saw the other half of my soul. Checkmate. I went from a completely controlled existence, a life where I made every decision with cold calculation, to a man overcome with feelings and emotions that were foreign but somehow wonderful. And all too soon after that cataclysmic change was this fourth one, this one where I begged a God I'd never entertained to spare the life of a woman that I could not live without. Mr. Beautiful is a continuation of the Up in the Air series, told from the male point of view, with POVs from James, Stephan, Tristan, Frankie, and Akira. This book is intended for readers 18 and up.

The Other Man R.K. Lilley 2015-05-25 Lourdes He was brazen as hell from the moment I laid eyes on him. He was aggressive, and dominant, with mac truck arms, and a bar brawler voice. He was too good looking for his own good, with a hard jaw, and harder eyes. I'd always led a fairly peaceful life, but even I could tell at a glance that this man was dangerous. For so many reasons. Not the least of which being that rough, dirty, sheet-clawing sex fairly radiated off him. I'd thought I'd known how to handle every kind of man, but this one left me baffled. To say he wasn't my type was putting it lightly. But you couldn't tell that to my libido. Not even when I found out the truth. My lover had lied to me from the very start. Nothing about our meeting was a coincidence.

Love My Way Kate Sterritt 2017-05-31 Her name is Emerson Hart and she is the love of his life. Unfortunately, he's not the only love of hers. And therein lies the problem.

Gasotransmitters in Plants Lorenzo Lamattina 2016-09-01 This book describes the three gasotransmitters nitric oxide (NO), hydrogen sulphide (H₂S) and carbon monoxide (CO) and their function as intracellular signalling molecules in plants. Common properties are shared by NO, H₂S and CO: they are beneficial at low concentrations but hazardous in higher amounts; they are small molecules of gas; they can freely cross cell membranes; their effects do not rely on receptors; they are generated enzymatically and their production is regulated; their functions can be mimicked by exogenous application; and their cellular effects may or may not be mediated by second messengers, but have specific cellular and molecular targets. In plants, many aspects of the biology of gasotransmitters remain completely unknown and generate intriguing questions, which will be discussed in this book.

Rock Bottom R K Lilley 2013-11-13 ROCK BOTTOM BOOK TWO: TRISTAN & DANIKA Their love had the power of a runaway freight train, and the potential to be just as destructive. The tempestuous sequel to Bad Things picks up where the first book left off. Reeling from a profound loss, Tristan and Danika struggle to pick up the pieces and build a life together, but the hard habits of a lifetime are not so easy to escape. Rock Bottom takes us on a dual point of view journey through addiction and desire, through love and agony, and answers the question we've been asking since these characters were introduced in Grounded: "What happened between Tristan and Danika?" DANIKA Even love couldn't cushion a fall like ours. My love for Tristan was so big that I felt consumed by it, and even so, it was not enough to overpower our combined demons. I struggled. I yelled and screamed. I scratched and kicked. I fought like hell, but even the most determined fighters have to stop before they break. No one could say I didn't fight for him. "I love you," I spoke softly into his ear. He gripped me harder. "I can't ever lose you, Danika. I'm not sure I'd survive it." "You've got me. And I'm not going anywhere. Not ever." I meant the words when I said them, but life had other plans for us. I'd have given my life for that fight. In fact, I very nearly did. TRISTAN She was the one. If I'd ever had a doubt, I didn't now. She was the one I'd be thinking about, longing for, until I took my last breath. If I lost her tomorrow, I'd pine for her like a lovesick fool. This was the kind of love that only hit you once in

your life.

Archaeology of Ancient Australia Peter Hiscock 2007-12-12 This book is an introduction to the archaeology of Australia from prehistoric times to the eighteenth century AD. It is the only up-to-date textbook on the subject and is designed for undergraduate courses, based on the author's considerable experience of teaching at the Australian National University. Lucidly written, it shows the diversity and colourfulness of the history of humanity in the southern continent. The Archaeology of Ancient Australia demonstrates with an array of illustrations and clear descriptions of key archaeological evidence from Australia a thorough evaluation of Australian prehistory. Readers are shown how this human past can be reconstructed from archaeological evidence, supplemented by information from genetics, environmental sciences, anthropology, and history. The result is a challenging view about how varied human life in the ancient past has been.

Fascinating Facts about Phytonutrients in Spices and Healthy

Food Louis S. Premkumar, PhD 2014-03-25 For centuries, there have been claims that healthy food garnished with exotic spices and condiments provides vital nutrients that help ward off diseases, especially preventable diseases such as diabetes and heart disease (hypertension, coronary artery disease) and promote longevity. The purpose of writing this book is to update the public about the health benefits of ingredients (phytochemicals) in spices and healthy food using existing scientific evidence. The ultimate proof of health benefits will be deciphered by the isolation and identification of specific phytochemicals acting on specific receptors in the body exerting their biological effects. The important point being emphasized is that if the physiological effect of an ingredient is glaring, it is considered to elicit a significant response. However, when the effect of an ingredient is significant, yet the effect is not readily perceivable then the usefulness goes unnoticed and can be questioned as a myth. For example, coffee has several ingredients, but only caffeine acting on the adenosine receptors stimulates the central nervous system and promotes wakefulness. Similarly, the specific active ingredient in hot chili pepper, capsaicin, activates a member of a recently identified family of receptors called transient receptor potential (TRP) channels. TRP vanilloid 1 (TRPV1), which is involved in certain modalities of pain, promotes the release of hormones in the gastrointestinal (GI) tract. Although, the bioavailability of the active ingredients is low, it is important to realize that these ingredients can cause significant local effects in the GI tract by preventing cholesterol regeneration by subduing microbiota, inhibiting precancerous growth by promoting calcium influx and stimulating nerve endings to transmit information and to release of gut hormones that are involved in regulating a variety of functions including appetite and satiety.

Arranged R.K. Lilley 2019-04-23 "I didn't read this book, I devoured it. Arranged marriage is one of my favorite tropes and RK Lilley completely blew it out of the water. Arranged is angsty, sexy, and heartbreaking. Immediately adding it to my future re-read list. Banks is my new favorite

alpha bully." Claire Contreras, New York Times Bestselling Author "Fatally beautiful. Gut-tightening intensity. Off the charts sexual chemistry and a love story unlike any other. You will devour this tale by RK Lilley and only want more." Audrey Carlan, #1 NYT Bestselling Author "Classic RK Lilley with all the angst, steam, and edginess she does so damn well. I loved it!" Kylie Scott, NYT & USA Today Bestselling Author "Some books are simply better than others. This is one of those books. Calder Banks Castelo is a jerk of epic proportions. Jerk-a-licious perfection. Banks and Noura together light the pages on fire. Sensual, angsty, exquisite. Don't miss it." Jana Aston, New York Times Bestselling Author There were rules in the cash-for-beauty game. The money held the power. The beauty followed the rules and jumped through the hoops. THE BRIDE I knew what everyone would think if they knew the truth about my marriage. They'd be shocked and appalled. And rightly so. I was a young, modern, independent woman, and I'd done the unthinkable. I'd sold my virginity to a spoiled, rich boy. To a stranger who didn't love me. And yes, I'd done it all for money. THE GROOM My bride was as gorgeous as she was unwelcome. As desirable as she was unwanted. I wanted nothing to do with her, but that didn't seem to matter exactly the second she got close enough to touch. I wanted her to hate me more than she loved the millions she'd sold herself for. I wanted to spurn her, but unfortunately, I wanted to f*ck her more. ARRANGED is a standalone erotic romance.

Culture, Mind, and Brain Laurence J. Kirmayer 2020-09-24 Recent neuroscience research makes it clear that human biology is cultural biology - we develop and live our lives in socially constructed worlds that vary widely in their structure values, and institutions. This integrative volume brings together interdisciplinary perspectives from the human, social, and biological sciences to explore culture, mind, and brain interactions and their impact on personal and societal issues. Contributors provide a fresh look at emerging concepts, models, and applications of the co-constitution of culture, mind, and brain. Chapters survey the latest theoretical and methodological insights alongside the challenges in this area, and describe how these new ideas are being applied in the sciences, humanities, arts, mental health, and everyday life. Readers will gain new appreciation of the ways in which our unique biology and cultural diversity shape behavior and experience, and our ongoing adaptation to a constantly changing world.

The Road to Results Linda G. Morra-Imas 2009 'The Road to Results: Designing and Conducting Effective Development Evaluations' presents concepts and procedures for evaluation in a development context. It provides procedures and examples on how to set up a monitoring and evaluation system, how to conduct participatory evaluations and do social mapping, and how to construct a "rigorous" quasi-experimental design to answer an impact question. The text begins with the context of development evaluation and how it arrived where it is today. It then discusses current issues driving development evaluation, such as the Millennium Development Goals and the move from simple project evaluations to the broader understandings of complex evaluations. The topics of implementing 'Results-based Measurement and Evaluation' and constructing a 'Theory of Change' are emphasized throughout the text. Next, the authors take the reader down 'the road to results,' presenting procedures for evaluating projects, programs, and policies by using a 'Design Matrix' to help map the process. This road includes: determining the overall approach, formulating questions, selecting designs, developing data collection instruments, choosing a sampling strategy, and planning data analysis for qualitative, quantitative, and mixed method evaluations. The book also includes discussions on conducting complex evaluations, how to manage evaluations, how to present results, and ethical behavior--including principles, standards, and guidelines. The final chapter discusses the future of development evaluation. This comprehensive text is an essential tool for those involved in development evaluation.
