Friedman 2007-07-24 This Independence Day edition of *The World is Flat 3.0* includes an exclusive preview of *That Used to Be Us: How America Fell Behind in the World It Invented and How We Can Come Back*, by Thomas L. Friedman and Michael Mandelbaum, on sale September 5th, 2011. A New Edition of the Phenomenal #1 Bestseller "One mark of a great book is that it makes you see things in a new way, and Mr. Friedman certainly succeeds in that goal," the Nobel laureate Joseph E. Stiglitz wrote in *The New York Times* reviewing *The World Is Flat* in 2005. In this new edition, Thomas L. Friedman includes fresh stories and insights to help us understand the flattening of the world. Weaving new information into his overall thesis, and answering the questions he has been most frequently asked by parents across the country, this third edition also includes two new chapters--on how to be a political activist and social entrepreneur in a flat world; and on the more troubling question of how to manage our reputations and privacy in a

world where we are all becoming publishers and public figures. The World Is Flat 3.0 is an essential update on globalization, its opportunities for individual empowerment, its achievements at lifting millions out of poverty, and its drawbacks-- environmental, social, and political, powerfully illuminated by the Pulitzer Prize--winning author of The Lexus and the Olive Tree.

The Maruti Story R C Bhargava 2010-02-02 An
extraordinary and rare insight into how a few
determined entrepreneurs created an icon... - C. K.
Pralhad The targets were stupendous and
considered unachievable by almost everyone.
Slightly over two years to find a suitable partner,
finalize all legal documentation, get governmental
approval to these agreements as well as to the
investment proposals, build a factory, develop a
supplier base to meet localization regulations, create
a sales and service network, and develop and launch
a peoples car that would sell 100,000 a year, in a
sector where Indian expertise was limited. And to
do this as a public sector company, having to follow
all governmental systems and procedures, and
having to please both its masters in the government
and Suzuki Motor Corporation. However, the
Maruti project succeeded, and in ways that were
unimaginable in 1983. The car revolutionized the
industry and put a country on wheels. Suddenly,
ordinary middle-class men and women could aspire
to own a reliable, economical and modern car, and
the steep sales targets were easily met. Twenty-six
years later, the company, now free of government
controls and facing competition from the worlds
major manufacturers who have entered the Indian
market, still leads the way. Not only that, cars made
by Maruti can be seen in all continents. By any
yardstick, it is an incredible story, involving grit,
management skill and entrepreneurship of a high
order. R.C. Bhargava, who was at the helm of
the company, and is currently its chairman, co-

writing with senior journalist and author Seetha,
shows how it was done in this riveting account of a
landmark achievement.

Yang, Korea, gives away his twelve year old son to
the nationalist patriot, Doh Sahn, in 1908. Following
the ardent Patriot, thrusts the teenager into the
midst of an international struggle raging in the
Korean Peninsula. Japan proceeds to annex Korea

thwart the annexation. As the Japanese police close
in, the Patriot and the teenager escape to Tsingtao
and Vladivostok; the two finally reach New York
in 1911, as Korea is no more. The teenager struggles
alone to survive in America, and enters Asbury
College in Kentucky. Rev. Robert Nahm-Soo
Chung in 1926 returns to his homeland. His
Evangelistic Crusade Team carries a huge tent of six
thousand capacity, on a van-truck provided by
American campgrounds and churches. The Team

Japanese, during their darkest hours. Hundreds of
thousands of people come to Jesus. He suffers
torture in the Japanese prison, for preaching the
gospel, and for his close tie with the Patriot. You
will walk through his tears and triumphs to preach
the gospel. Paul M. Chung, PH.D, is a retired
engineering Professor and Dean Emeritus of an
engineering college.

Parentology Dalton Conley 2014-03-18 An award-
winning scientist offers his unorthodox approach to
childrearing: "Parentology is brilliant, jaw-
droppingly funny, and full of wisdom...bound to
change your thinking about parenting and its
conventions" (Amy Chua, author of Battle Hymn of
the Tiger Mother). If you're like many parents, you
might ask family and friends for advice when faced
with important choices about how to raise your
kids. You might turn to parenting books or simply
rely on timeworn religious or cultural traditions.

But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In *Parentology*, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. *Parentology* teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

IRON MAKING AND STEELMAKING

AHINDRA GHOSH 2008-02-29 This authoritative account covers the entire spectrum from iron ore to finished steel. It begins by tracing the history of iron and steel production, right from the earlier days to today's world of oxygen steelmaking, electric steelmaking, secondary steelmaking and

continuous casting. The physicochemical fundamental concepts of chemical equilibrium, activity-composition relationships, and structure-properties of molten metals are introduced before going into details of transport phenomena, i.e. kinetics, mixing and mass transfer in ironmaking and steelmaking processes. Particular emphasis is laid on the understanding of the fundamental principles of the processes and their application to the optimisation of actual processes. Modern developments in blast furnaces, including modelling and process control are discussed along with an introduction to the alternative methods of ironmaking. In the area of steelmaking, BOF plant practice including pre-treatment of hot metal, metallurgical features of oxygen steelmaking processes, and their control form part of the book. It also covers basic open hearth, electric arc furnace and stainless steelmaking, before discussing the area of casting of liquid steel—ingot casting, continuous casting and near net shape casting. The book concludes with a chapter on the status of the ironmaking and steelmaking in India. In line with the application of theoretical principles, several worked-out examples dealing with fundamental principles as applied to actual plant situations are presented. The book is primarily intended for undergraduate and postgraduate students of metallurgical engineering. It would also be immensely useful to researchers in the area of iron and steel.
