text and K-8 practitioner resource demonstrates how successful literacy teachers combine explicit skills instruction with an emphasis on reading for meaning. Distinguished researcher Richard L. Allington builds on the late Michael Pressley's work to explain the theories and findings that guide balanced teaching and illustrate what exemplary lessons look like in action. Detailed examples offer a window into highly motivating classrooms around the country. Comprehensive in scope, the book discusses specific ways to build word recognition, fluency, vocabulary, and comprehension, especially for readers who are struggling. New to This Edition *Updated throughout to reflect important recent research advances. *Chapter summing up the past century's reading debates and the growing acceptance of balanced teaching. *New and revised vignettes of exemplary teachers.

Economic and Personal Finance Education in Our Nation's Schools In 2004 Robert F. Duvall 2008-10
This survey gives an indication of how best to address the teaching of economics and personal finance in our nation. It

must be state-by-state, because that is where curriculum decisions are made. The federal government must encourage states to place economic and personal finance education not only into state standards, but into the core curriculum. This report looks at the national picture and sees where we are succeeding and where we need more attention. Tables and maps.

Schools Cannot Do it Alone Jamie Robert Vollmer 2010 Schools Cannot Do It Alone tells of Jamie Vollmer, businessman and attorney, as he travels through through the land of public education. His encounters with blueberries, bell curves, and smelly eighth graders lead him to two critical discoveries. First, we have a systems problem, not a people problem. We must change the system to get the graduates we need. Second, we cannot touch the system without touching the culture of the surrounding town; everything that goes on inside a school is tied to local attitudes, values, traditions, and beliefs. Drawing on his work in hundreds of districts, Jamie offers teachers, administrators, board members, and their allies a

practical program to secure the understanding, trust, permission, and support they need to change the system and increase student success.

Sequoyah James Rumford
2004-11-01 The story of Sequoyah is the tale of an ordinary man with an extraordinary idea—to create a writing system for the Cherokee Indians and turn his people into a nation of readers and writers. The task he set for himself was daunting. Sequoyah knew no English and had no idea how to capture speech on paper. But slowly and painstakingly, ignoring the hoots and jibes of his neighbors and friends, he worked out a system that surprised the Cherokee Nation—and the world of the 1820s—with its beauty and simplicity. James Rumford’s Sequoyah is a poem to celebrate literacy, a song of a people’s struggle to stand tall and proud.

The Status of Social Studies Jeff Passe 2013-10-01 A team of researchers from 35 states across the country developed a survey designed to create a snapshot of social studies teaching and learning in the United States. With over 12,000 responses, it is the largest survey of social studies teachers in over three decades. We asked teachers about their curricular goals, their methods of instruction, their use of technology, and the way they address the needs of English language learners and students with disabilities. We gathered demographic data too, along with inquiries about the teachers’ training, their professional development experiences, and even whether they serve as coaches. The enormous data set from this project was analyzed by multiple research teams, each with its own chapter. This

volume would be a valuable resource for any professor, doctoral student, or Master's student examining the field of social studies education. It is hard to imagine a research study, topical article, or professional development session concerning social studies that would not quote findings from this book about the current status of social studies. With chapters on such key issues as the teaching of history, how teachers address religion, social studies teachers' use of technology, and how teachers adapt their instruction for students with disabilities or for English language learners, the book's content will immediately be relevant and useful.

None of the Above Shani

Robinson 2019-01-15 An insider's account of the infamous Atlanta Public Schools cheating scandal that scapegoated black employees for problems rooted in the education reform movement. In March of 2013, 35 educators in the Atlanta Public Schools were charged with racketeering and conspiracy—the same charges used to bring down the American mafia—for allegedly

changing students' answers on standardized tests. All but one was black. The youngest of the accused, Shani Robinson, had taught for only 3 years and was a new mother when she was wrongfully convicted and faced up to 25 years in prison. She and her coauthor, journalist Anna Simonton, look back to show how black children in Atlanta were being deprived long before some teachers allegedly changed the answers on their students' tests. Stretching all the way back to *Brown v. Board of Education*, the landmark 1954 Supreme Court ruling that outlawed segregation in public schools, to examining the corporate-led education reform movement, the policing of black and brown citizens, and widening racial and economic disparities in Atlanta, Robinson and Simonton reveal how real estate moguls and financiers were lining their pockets with the education dollars that should have been going to the classroom.
