Parentology Dalton Conley 2014-03-18 An award-winning scientist offers his unorthodox approach to childrearing: "Parentology is brilliant, jaw-droppingly funny, and full of wisdom...bound to change your thinking about parenting and its conventions" (Amy Chua, author of Battle Hymn of the Tiger Mother). If you're like many parents, you might ask family and friends for advice when faced with important choices about how to raise your kids. You might turn to parenting books or simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley's sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with lessons that go down easy. You'll be laughing and learning at the same time.

Vintage and Classic Tractor Restoration Richard Lofting 2017-02-28 Vintage and Classic Tractor Restoration is a complete guide to the subject, looking at how to initially purchase a tractor, through private means or at auction, and then how to restore it back to its former glory, as it would have looked when it left the factory. It is even possible to preserve a classic tractor in its working condition, which has a unique appeal to some tractor collectors and in some ways is harder than a full restoration to undertake. Practical

techniques have been amply illustrated throughout the book, ranging from the simple use of a lathe or milling machine to the making from scratch of various tools useful in restoration work. Rather than just replacing items such as carburettor, starter motor or dynamo, practical advice is given on how to test and rebuild these components back to full operation. Fifty-two practical picture spreads show techniques suitable for restorers of all levels of skill. Contents: Setting up the workshop and making specialist tools; Finding a tractor to restore; Engine and fuel; Electrical systems; Transmission and brakes; Wheels, tyres and steering; Hydraulics and the three-point linkage; Metalwork; Painting and finishing. Aimed at serious tractor enthusiasts and agricultural machinery engineers and fully illustrated with 1100 colour photographs.
