Cost Accounting Cecily A. Raiborn 2005-02-01 The most practical, real-world presentation of cost accounting on the market, this book blends a traditional and proven method of teaching cost accounting with the integration of innovative topics. Cost topics are covered in the context of organizational strategy and operational tactics, as cost management decisions are sensitive to strategies driven by quality, cost, and innovation. Kinney, Prather-Kinsey, and Raiborn reinforce the material with real-world examples and visual illustrations that bring cost management techniques into the student's sphere of understanding. A flexible organization appropriate for either a one- or two- semester course--coupled with clear and abundant visual presentations--allows students to clearly understand difficult topics. The text's revised organizational structure streamlines chapter materials as well as reduces redundancy between cost accounting and other business courses.

Service Business Costing Markus B. Baum 2012-08-17 Service firms have high overhead costs which are difficult to assign to individual services. To bring transparency to their value chain, they need costing approaches that help them find their own improvements. Markus B. Baum explores current theory and practice of value chain approaches and cost accounting to develop a costing approach with a suitable instrument for the allocation of fixed and overhead costs for a service firm. He describes the service business costing (SBC) approach. This hybrid-costing model has a hierarchical structure in terms of consolidation and allocates cost and revenues on the lowest hierarchical level possible to ensure that all costs and income are assigned to activities from which they originated.

Survey of Accounting Cecily A. Raiborn 2002-12-16 This book provides the basics of both financial and managerial accounting. Financial accounting provides primarily monetary information about business activities that result in the financial statements that are published for use by people outside the business. Managerial accounting provides monetary and nonmonetary information about business activities that result in supporting details for the financial statements or that provide information for internal organizational users to plan, control, or make decisions about operations. It is not intended to be a comprehensive volume in either financial or managerial accounting, but an introduction for non-business majors. The book takes a user

orientation, steering clear of detailed, technical discussions. Many interesting examples from the travel industry are integrated throughout to catch the reader's interest and to apply concepts to companies they may know.

Initial National Priorities for Comparative Effectiveness Research Institute of Medicine 2009-11-14 Clinical research presents health care providers with information on the natural history and clinical presentations of disease as well as diagnostic and treatment options. In today's healthcare system, patients, physicians, clinicians and family caregivers often lack the sufficient scientific data and evidence they need to determine the best course of treatment for the patients' medical conditions. Initial National Priorities for Comparative Effectiveness Research (CER) is designed to fill this knowledge gap by assisting patients and healthcare providers across diverse settings in making more informed decisions. In this 2009 report, the Institute of Medicine's Committee on Comparative Effectiveness Research Prioritization establishes a working definition of CER, develops a priority list of research topics, and identifies the necessary requirements to support a robust and sustainable CER enterprise. As part of the 2009 American Recovery and Reinvestment Act, Congress appropriated \$1.1 billion in federal support of CER, reflecting legislators' belief that better decisions about the use of health care could improve the public's health and reduce the cost of care. The Committee on Comparative Effectiveness Research Prioritization was successful in preparing a list 100 top priority CER topics and 10 recommendations for best practices in the field.

The Cambridge Handbook of Compliance Benjamin van Rooij 2021-05-20 Compliance has become key to our contemporary markets, societies, and modes of governance across a variety of public and private domains. While this has stimulated a rich body of empirical and practical expertise on compliance, thus far, there has been no comprehensive understanding of what compliance is or how it influences various fields and sectors. The academic knowledge of compliance has remained siloed along different disciplinary domains, regulatory and legal spheres, and mechanisms and interventions. This handbook bridges these divides to provide the first one-stop overview of what compliance is, how we can best study it, and the core mechanisms that shape it. Written by leading experts, chapters offer perspectives from across law, regulatory studies, management science, criminology, economics, sociology, and psychology. This volume is the definitive and comprehensive account of compliance.

Activity-Based Costing and Management Ernest Glad 1996-11-14 This book takes activity-based costing and management beyond its purely technical aspects, and introduces a holistic approach to fundamental issues such as management of cost, time, quality, funds and other constraints. Activity-based costing and management is not just a new way of computing business figures, but requires a fundamental understanding of all management issues. By adopting a customer-oriented approach to the development of management and accounting systems the authors expose the shortcomings of traditional accounting systems. This practical book is much more than a collection of new cost measurement techniques, it emphasises the philosophies the modern accountant must adopt to help the organisation add value to its shares.

Ethics in Small and Medium Sized Enterprises Laura Spence 2010-10-01 This book is the first of its kind - a global overview of extant research on ethics in small and medium sized enterprises. While vast amounts of corporate money, government policy and media time are directed at the social and ethical activities of large corporations, small businesses don't generally attract the spotlight. This is wildly inappropriate, however, since upward of 90% of private businesses are small or medium sized. This book goes some way to helping us understand the social and ethical contribution of this majority organizational form. The first section of the book is a global round-up of research on ethics in small and medium sized enterprises from major regions of the world. In the second section smaller scale research projects from a variety of countries present both empirical and theoretical advances in the area. Anyone with an interest in ethics and small and medium sized enterprises should find this an inspiring book which paves the way for future research.

Repertorium Bibliographicum Ludwig Hain 2010-11 2010 Reprint of 1931 Edition. Giovanni Battista Lamperti (1839 -1910) was an Italian singing teacher and son of the singing teacher Francesco Lamperti. He is source for Vocal Wisdom: Maxims of Giovanni Battista Lamperti (1931). His preferred teaching arrangement was having three or four students present at each lesson: each would get their turn while the others observed and learned thereby. He was said to be a strict, exacting instructor not given to flattery, but who enthusiastically praised his students upon exceptional achievement. Many of Giovanni's students became international opera stars including Irene Abendroth, Marcella Sembrich, Ernestine Schumann-Heink, Paul Bulss, Roberto Stagno, David Bispham and Franz Nachbaur. The Technics of Bel Canto is the only book (other than the maxims recalled and published posthumously by his pupil William E. Brown) that Giovanni ever wrote on his method.
